## Education

### Instituto Industrial Luis A. Huergo

Técnico electrónico  
especialista en computación  
2003-2008

### Universidad abierta interamericana

Ingenieria en sistemas  
2009-2015 (incompleto)

### Platzi

English-B1  
(En curso)

## Career Objective

### Full Stack Web Developer

I walk my path in web development with enthusiasm and dedication. My passion for self-improvement and my commitment to constant growth make me a motivated candidate willing to face new challenges.

I can work on Frontend and Backend. My goal is to provide the highest possible performance applying modern technique end to end

## Projects History

### Techs

HTML

CSS

JavaScript

React.js

Next.js

Node.js

NestJS

SQL

Docker

PostgreSQL

### E-commerce

Techs: HTML-CSS-React

An e-commerce application where I demonstrate my skills in React, Tailwind CSS, JavaScript, Node.js, and PostgreSQL. This project includes features such as a shopping cart, login functionality, and more, showcasing my skills to follow best practices while achieving optimal levels of abstraction.

### API e-commerce

Techs: JS-Node-PostgreSQL-Docker

This e-commerce API enables the management of products, users, orders, logins, and more, all handled server-side through a RESTful API. It is built with Express.js, which simplifies web application development by managing routes and middleware. It uses Joi for data validation and Boom for error handling. PostgreSQL is employed as the database, with Sequelize serving as the ORM, while Docker is used for containerization. Additionally, bcrypt and Passport ensure authentication and security

## Study Program

## Projects History

Backend with Node.js

Frontend with React.js

TypeScript

Full Stack Developer With JavaScript

### WebChat

Techs: HTML-CSS-JS-Node

The WebChat project is a real-time messaging application that enables users to communicate with each other using WebSocket. It uses tools such as Express.js and Socket.io to ensure efficient and stable message exchange.
